Re: Kay Mine Project

Dear Marc:

Thank you for the opportunity to visit your Kay Mine exploration site in February.

It seems to me that you and the Arizona Metals team are doing things the right way. Before you can have success in a visible operation in the community like mine drilling, you have to meet concerns and answer questions head on, and you are doing that.

As a state representative of the legislative district in which you are operating, I care very much about the potential for job creation and economic activity that your project represents. But I also care about the quality of life of the citizens that I represent, so I appreciate all you are doing to work with the people that live in the area.

I am very supportive of your project and would appreciate continuing to be kept informed of your progress and would look forward to being helpful in whatever ways that I can.

Sincerely,

A handwritten signature in black ink that reads "Noel Campbell".

State Representative Noel Campbell
